The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/510,386	Applicant(s) ANDERSEN ET AL.	
	Examiner NANCY VOGEL	Art Unit 1636	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 43-62 are pending in the case.

Claim Rejections - 35 USC § 112

Claims 43-62 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

This rejection is maintained essentially for the reasons made of record in the previous Office action, mailed 10/5/07.

Applicant's arguments filed 3/5/08 have been considered but have not been found convincing.

Applicants have argued that it is within the skill in the art to identify the amino acids which can be modified and still retain the function as a secreted polypeptide, and furthermore, that it would be apparent to persons skilled in the art that other mutations would result in at least 5% less of the secreted polypeptide, and gives the example of "a substitution of the start codon ATG would result in at least 5% less of the secreted polypeptide". However, the genus encompassed by the claims encompasses other species than a total deletion of the gene, or a substitution of the start codon ATG. The genus encompasses any variant which yields the result of at least 5% less of the secreted product, and the a representative number of species encompassed by the genus have not been described in structural terms. The art has not remedied this

Art Unit: 1636

matter by providing any teaching regarding the structure and function of the protein whose sequence is shown in SEQ ID NO:134. Therefore, the rejection is maintained.

The following rejection is new and was not necessitated by applicant's amendments:

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 43-62 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 43 and by dependence claims 44-62 are vague and indefinite in the recitation of "derived from a parent B. licheniformis host cell". "Derived from" is a term that is non-specific and relative in nature for which Applicant provides no definition. It provides no clarity as to what Applicant's claimed invention includes and what it does not include. Without a more specific definition, it is impossible to determine what and how many derivations comprise the invention. The nature and number of the derivations to arrive at the invention Applicant seeks to protect with the patent are not established such that a person skilled in the art would be apprised of the metes and bounds of the claims. The limits of the inventions cannot be discerned and others could not know if they were infringing Applicant's claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NANCY VOGEL whose telephone number is (571)272-0780. The examiner can normally be reached on 7:00 - 3:30, Monday - Friday.
